FEDERAL FUNDS (FY15)

Source: ASTHO 2017 Profile

IMPACT OF POTENTIAL CUTS TO FEDERAL FUNDING

-  Cut or eliminate public health programs that help individuals stay healthy and prevent disease leading to lost productivity due to illness and increased health care costs when they get sick
-  Reduced ability to respond to environmental health threats putting communities at risk for health hazards
-  Reduce or eliminate the capacity to analyze public health data. The loss of this capacity limits the ability to make informed decisions about disease prevention and health planning.
-  Reduced capacity to respond to public health emergencies putting more people at risk of harm due to natural disasters and health threats due to terrorism.
-  Reduced capacity to develop population-wide policy solutions to address health issues

CDC 2018 OPIOID OVERDOSE CRISIS FUNDING

Year 1 (FY18) \$4,830,268

This funding will support Delaware in working to prevent opioid-related overdoses, deaths, and related outcomes. It will advance the understanding of the epidemic and scale-up prevention and response activities, including improving the timeliness of data. Specifically:

- Prescription Drug Monitoring Program system enhancements and EMR integration
- Data system enhancements for improved surveillance and heat mapping analysis
- Provider education activities around Delaware prescribing regulations, risks associated with opioids and alternatives to treat and manage chronic pain
- Naloxone access for first responders and communities

OPIOID STATISTICS

UNITED HEALTH FOUNDATION RANK

Strengths:

- High immunization coverage among children
- Low incidence of pertussis
- Low percentage of uninsured population

Areas for Improvement:

- High infant mortality rate
- Low rate of dentists
- High prevalence of physical inactivity
