Mission: To promote a healthy, safe, and stable environment for residents to be self-sufficient

ABOUT STATE PUBLIC HEALTH

State health agencies are working across the country to actively protect the public's health, prevent avoidable diseases and conditions, and promote healthy communities.

In 2016, birthing hospitals in Michigan began participating in the Michigan Alliance for Innovation on Maternal Health (MI-AIM).

Since participation in MI-AIM, there has been a 10.5% decrease in severe maternal morbidity, reducing the rate to 1.7%.

FEDERAL FUNDS (FY18)

IMPACT OF POTENTIAL CUTS TO FEDERAL FUNDING

Reducing the ability of individuals to lead healthy lives and contribute to their local communities and economies including protecting our country.

Increased rates of infectious disease due to limited capacity to protect people from infection and respond to communicable disease outbreaks.

Reduction in services to patients and populations served by the health department leading to longer wait times, potential worsening of chronic conditions, and decreased health status overall.

Delay disease outbreak response and investigation activities resulting in increased illness and death.

Reduced capacity to respond to public health emergencies putting more people at risk of harm due to natural disasters and health threats due to terrorism.

TOP HEALTH AGENCY PRIORITIES

- 1 Ensuring public health capacity to address emerging environmental and health threats, including PFAS and opioid misuse.
- 2 Continuing recovery and support efforts for Flint residents.
- 3 Promoting policies and practices that support all residents in attaining their optimal level of health. Utilizing data to guide decisions and practices.
- 4 Promoting the development and use of interoperable information systems for public health functions.

CDC 2018 OPIOID OVERDOSE CRISIS FUNDING

Year 1 (FY18) \$6,242,441.92

This funding will support Michigan in working to prevent opioid-related overdoses, deaths, and other outcomes. It will advance the understanding of the epidemic and scale-up prevention and response activities, including improving the timeliness of data. Specifically:

- Develop partnerships through a statewide, multi-sector Prescription Drug Overdose Prevention Stakeholder group to enhance information and resource sharing.
- Improve the coordination of opioid surveillance activities at state and local levels, including emergency department data and medical examiner death reporting.
- Provide information and resources to improve safer prescriber practices.

OPIOID STATISTICS

MI: Overdose Death Rates per 100,000 Population (Age-Adjusted)

Source: Kaiser Family Foundation's State Health Facts

UNITED HEALTH FOUNDATION RANK

Strengths:

- High rates of primary care physicians
- Low incidence of Salmonella
- High meningococcal immunization coverage among adolescents

Areas for Improvement:

- High prevalence of smoking
- Low percentage of high school graduation
- High cardiovascular death rate
