Mission: To promote health and prevent the leading causes of death, disease, and injury in Oregon

ABOUT STATE PUBLIC HEALTH

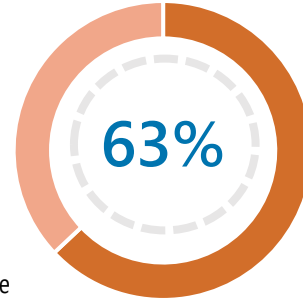

State health agencies are working across the country to actively protect the public's health, prevent avoidable diseases and conditions, and promote healthy communities.

Oregon implemented statewide prescribing guidelines and other strategies targeting clinicians, healthcare organizations, and consumers.

High-dose opioid prescriptions have decreased by 52%

FEDERAL FUNDS (FY15)

Source: ASTHO 2017 Profile

IMPACT OF POTENTIAL CUTS TO FEDERAL FUNDING

- Increased rates of infectious disease due to limited capacity to protect people from infection and respond to communicable disease outbreaks
- Delay disease outbreak response and investigation activities resulting in increased illness and death
- Reduce or eliminate the capacity to analyze public health data. The loss of this capacity limits the ability to make informed decisions about disease prevention and health planning.
- Reduced capacity to respond to public health emergencies putting more people at risk of harm due to natural disasters and health threats due to terrorism
- Less funding to provide local health departments to implement programs, potentially increasing the disease burden on the state's most vulnerable

CDC 2018 OPIOID OVERDOSE CRISIS FUNDING

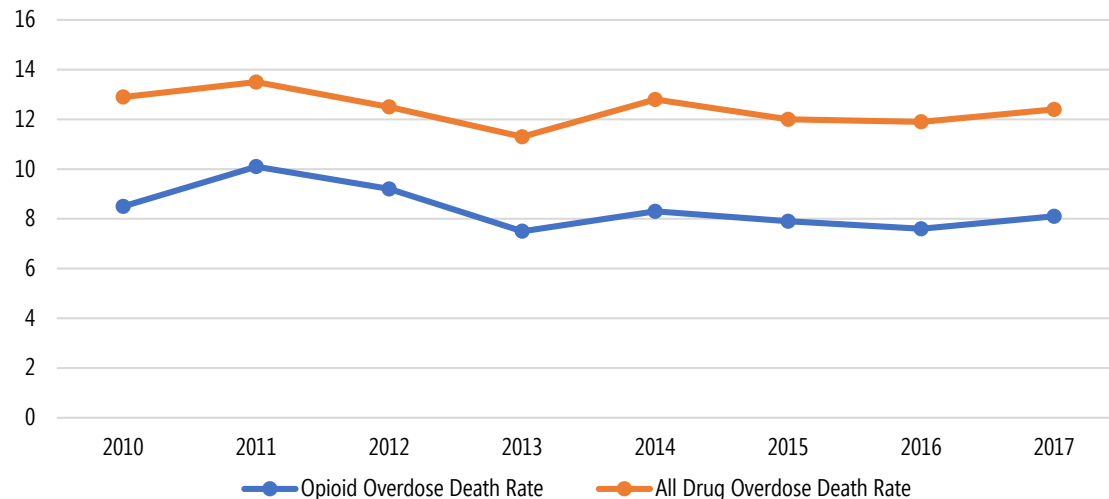

Year 1 (FY18) \$4,629,853.28

This funding will support Oregon in working to prevent opioid-related overdoses, deaths, and other outcomes. It will advance the understanding of the epidemic and scale-up prevention and response activities, including improving the timeliness of data. Specifically:

- Table-top exercises for local and tribal public health authorities
- Purchase TruNarc devices to enable field testing for fentanyl
- Improve overdose surveillance across multiple data streams
- Increase local capacity for rapid response communication about overdose clusters
- Develop a rapid response public education campaign

OPIOID STATISTICS

OR: Overdose Death Rates per 100,000 Population (Age-Adjusted)

Source: Kaiser Family Foundation's State Health Facts

UNITED HEALTH FOUNDATION RANK

Strengths:

- High rate of mental health providers
- Low cardiovascular death rate
- Low prevalence of physical inactivity

Areas for Improvement:

- Low percentage of high school graduation
- High prevalence of frequent mental distress
- Low meningococcal immunization coverage among adolescents
