

HOW HAVE YOU EXEMPLIFIED INNOVATION THIS YEAR?

RESPONSE EXAMPLES FROM DPH STAFF
KEEPING US BETTER SURVEY | AUGUST 2019

OHI's Data Display project is a collaboration with DCTS and will soon result (later this summer) in interactive data dashboards for substance use topics.
Cory Steinmetz, OHI

The WIC program is developing an internship in partnership with UW Health that will provide the opportunity for current nutrition staff working in WIC to become a registered dietitian with enhanced public health nutrition skills different than those of clinical dietitians.
Diane Moreau, WIC

SNAP-Ed is fully utilizing the Program Evaluation and Reporting System (PEARS), which is used to track and report behavioral outcomes and success stories for SNAP-Ed in several states.
Tony Zech, SNAP-Ed

DPH/BADR revised the uniform caregiver needs assessment using feedback gathered from family caregiver support coordinators from counties & tribes that use the instrument. Coordinators report it is a useful tool when trying to determine a caregiver's most pressing needs.
Lynn Gall, BADR

updating rule 140!
Deb Heim, SER OPPA

We have created a new package for cleaning birth data that is so efficient it now takes us only 44 hours per year (previously took 160 hrs) and can now be cleaned quarterly rather than annually, leading to better provisional data.
Laura Ninneman, OHI

We created a WEDSS module to monitor, collect data, and improve messaging around carbon monoxide poisoning & created many new products and systems to collect information on CO poisoning events in Wisconsin. It's our understanding that few, if any, states have similar surveillance for carbon monoxide.
Christy Vogt, BEOH

Tobacco is Changing Media Campaign - we put together recommendations to improve social media engagement, access, & utilization of campaign website - mid-campaign shows positive results for engagement for Pinterest
Vicki Huntington, TPCP

Trauma-informed care, using person first and appropriate language for people with disabilities, & health equity initiatives
Jean Kenevan, BADR

Lead SPA; Bio-monitoring program engaging the Burmese community in Milwaukee; School walk through program in high-burden asthma school districts; Alcohol density data on Environmental Public Health Tracking Portal
Carrie Tomasallo, BEOH

Silver Diamine Fluoride is a newly FDA approved product for arresting tooth decay that is cost effective, may prevent children from needing to go to the operating room, can be used on people of all ages that may have difficulty accessing affordable dental care, etc. The OHP was instrumental in policy development that provides WI Medicaid coverage for use of this product.
Robbyn Kuester, OHP
