

**ASTHOConnects: Telehealth Approaches for Treating SUD in Maternal and Child Populations
Speaker Biographies**

Constance Guille,

Associate Professor, Department of Psychiatry and Behavioral Sciences and
Obstetrics and Gynecology
The Medical University of South Carolina
guille@musc.edu

Dr. Connie Guille is an Associate Professor in the Department of Psychiatry and Behavioral Sciences and Obstetrics and Gynecology at MUSC. She is the Director of the MUSC Women's Reproductive Behavioral Health clinical and clinical research program and leads statewide and regional efforts to increase access to treatment for Opioid Use Disorder via telemedicine. Dr. Guille receives research support through the National Institutes of Health and foundations such as the Duke Endowment to conduct clinical research studies aimed at improving maternal mental health and reducing substance use.

Marcy Doyle, DNP, MHS, MS, RN, CNL

Clinical and Quality Improvement Director
New Hampshire Citizens Health Initiative (NHCHI), University of New Hampshire
marcy.doyle@unh.edu

Marcy Doyle is the Clinical and Quality Improvement Director and Adjunct Nursing Professor at the Institute for Health Policy and Practice (IHPP), New Hampshire Citizens Health Initiative (NHCHI), University of New Hampshire. Dr. Doyle's area of focus is delivery system design with an emphasis on underserved populations. Her history as Chief Operations Officer at a Federally Qualified Health Center, quality improvement consultant and educator have enabled her to work on statewide projects to test innovative practice-based solutions. As Principal Investigator of the Advanced Nursing Education Workforce grant, she is committed to advancing knowledge of practice improvement activities by bridging the gap between traditional graduate education, research and practice with an emphasis on the high priority areas of behavioral health, substance use disorder, telepractice and value-based reimbursement. Dr. Doyle is also the staff lead and concept originator of the Substance Abuse and Mental Health Services Administration (SAMHSA) Provider Clinical Support System (PCSS) grant which funds the University of New Hampshire's Partnership for Academic-Clinical Telepractice (PACT): Mediations for Addictions Treatment Extension for Community Care Outcomes (ECHO).

Alex Kearly, MPH

Director, Clinical to Community Connections
Association of State and Territorial Health Officials
akearly@astho.org

Alex supports ASTHO projects related to Medicaid, telehealth, and primary care transformation. She was previously at the George Washington University's Milken Institute School of Public Health, where she worked as a Senior Research Associate in the Department of Health Policy and Management. She holds a Master of Public Health degree from the George Washington University.

Janet Oputa, MPH

Senior Analyst, Clinical to Community Connections
Association of State and Territorial Health Officials
joputa@astho.org

Janet supports projects related to primary care transformation, telehealth, and health equity. She was previously at the Weitzman Institute, the research and innovation hub of the Federally Qualified Health Center, Community Health Center, Inc. During her time at the Weitzman Institute, Janet worked simultaneously as a Program Coordinator for the Project ECHO team, and a Project Manager for the HRSA-funded School-Based Consultations for Rural Pediatric

Telehealth (SCRiPT) project. She holds a Master of Public Health from George Mason University.
